F: READING:

Persian zebra is a large animal that is from the horse family. It is similar to a donkey but a little larger in size. You can find this endangered animal on the desert plains of Iran and it lives up to forty . Tooran National park and the protected areas of Bahram-e Gur are the two main natural homes of Persian zebra.

Just a few of these zebras are left alive, about 500, because people are destroying their natural homes and are changing them to roads and fields. So, they move to new places but they can't find enough food there. In some areas, cattle and sheep destroy the plants and trees on the plains and don't leave any food for the zebras. Wolves and leopards are the natural hunters of Persian zebra but most of them are hunted by hunters, not by these wild animals.
