There is also a brain, which is the most important part of our body. Our brain gives us the ability to think, feel, move, and react quickly. The brain controls our thoughts, feelings, and actions. The brain leads all other parts of our body. Without the brain, there would be no body at all. Our body is full of blood that keeps it healthy. Our blood is full of good vitamins, minerals, and chemicals that give all the cells in our body the energy they need to work. If there is a disease in our blood, it can spread to other parts of the body and make them sick too. The best way to thank Allah for this wonderful gift is to take care of it.
